

# Bringing Quality Parts and Products to Market Faster

## CASE STUDY

### Customer Profile

Interlink works with clients to design and bring parts and products from prototype to production.

### Manufacturing Challenge

Interlink's customers need precise manufacturing or parts requiring machining precision or high-quality 3D printing.

### A3D Manufacturing Solution

Interlink utilized A3D's additive and traditional manufacturing expertise and capabilities to create parts and products on time and within budget.

### Products

3D Printing, CNC Machining, Injection Molding, Cast Urethane, 3D Scanning

### Outcomes & Benefits

By partnering with A3D Manufacturing, Interlink's customers have access to a unique portfolio of manufacturing processes and industry expertise to accelerate their time to market.

"There are stair steps along the way to production. A3D [Manufacturing] has options all along that staircase. Sometimes it's 3D printing, cast parts, low production molds or getting machined. **Even without a huge budget, you'll be able to get to the point of releasing your product.**" – Dylan Pratt, Owner and Director of Engineering at Interlink Engineering

### A3D Manufacturing Is a Trusted 3D-Printing Partner

A3D Manufacturing was established in 2019 to provide companies with a way to create high-quality 3D-printed parts within a fast production time at an affordable price.

The company offers many additive manufacturing methods (including HP Jet Fusion and Markforged Metal X technology), post-processing services, CNC machining, injection molding, cast urethane and engineering design services.

A3D Manufacturing is a certified HP Digital Manufacturing Partner (DMP) and **ISO 9001:2015** manufacturer. Visit its website at [a3dmfg.com](http://a3dmfg.com).

## Benefits

**Faster  
Production  
Speeds**

**Multiple  
Manufacturing  
Process**

**Great  
Customer  
Service**
